SUMMARY

Logical and results-driven full stack developer dedicated to building and optimizing user-focused websites and applications. Technically proficient and analytical problem solver with calm and focused demeanor.

EXPERIENCE

Amarya Business Consultancy, Jabalpur — Full Stack Developer

July 2022 - PRESENT

- Led a cross-functional team to successfully plan, design, and execute the development of a comprehensive Business Management System Project, ensuring robust and scalable solutions.
- On-site at **Samsung SDS**, I played a key role in their project by providing face-to-face support, troubleshooting, and ensuring the client's needs were met.
- Designed and developed web applications using a full stack technology stack, including front-end technologies (e.g., React, HTML, CSS) and back-end technologies (e.g., Node.js, Express.js).
- Wrote clean, efficient, and maintainable code, adhering to coding standards and best practices.
- Prioritized the security of the complete system.
- Built and maintained databases, incorporating both SQL and NoSQL solutions such as MySQL and MongoDB.

EDUCATION

Gyan Ganga College of Technology, Jabalpur — Master's of Computer Application

July 2022 - May 2024

CGPA : 7.69

Jabalpur College of Computers and Communication, Jabalpur — Bachelor of Computer Application

PROJECTS

Radhika Business Management System

- Created and developed project architecture, ensuring robust and scalable solutions.
- Developed a Business Management System (BMS) using technologies like **Node.js**, **Express**, **React.js** and **MySQL**.
- Integrated RESTful APIs to facilitate data communication and interaction with external systems.
- Enabled businesses to record their items, orders, bills, customers, stocks, etc.
- Developed efficient and maintainable software according to project needs.
- Resolved various software errors and provided required status reports.

Pizza Ordering Platform

URL: <https://pizza-lover-app.netlify.app/>

- Designed and implemented a user-friendly interface for seamless pizza ordering experiences.
- Utilized technologies like **Node.js**, **Express**, **React.js**, and **MongoDB** for full-stack development.
- Enabled users to customize their pizzas by choosing bases, toppings, cheeses, and sauces to create personalized orders.
- Developed an admin dashboard for managing orders, inventory, and customer data efficiently.
- Conducted thorough testing to ensure high performance, reliability and user satisfaction.
